

Flush Mount Garage Door: ArchiCAD Files

Kinetic Access · Version 1.0 · October 2026

Thanks for downloading our flush mount garage door files. This sheet explains what's in the download and how to use it.

What's in this download

File	What it is	How to use it
Kinetic Access Flush Mount Garage Door Details.mod	2D details of the door	Drag and drop it into your ArchiCAD project
Kinetic Access Flush Mount Garage Door Template.pln	Template project for creating a door sized to your opening	Open it, size the door, then save it as a library part
README.pdf	This sheet	

Walkthrough video: [YouTube link](#). Watch this before you use the template for the first time. It takes 3 minutes.

Which version to download

ArchiCAD opens files saved in older versions, but not newer ones. Download the version that matches yours. If we don't have your version, download the next one down.

Your ArchiCAD version	Download
25 or 26	ArchiCAD 25 files
27 or 28	ArchiCAD 27 files
29 or later	ArchiCAD 29 files

Using the template

1. Open the template (.pln) in ArchiCAD.
2. Adjust the door to suit your opening, following the walkthrough video.
3. Save the door as an ArchiCAD library part.
4. Load the library part into your own project and place it.

Using the 2D details

Drag the .mod file into your ArchiCAD project. The details then sit in your project like any other drawing.

Before construction

These files are for design and documentation. Dimensions and details are typical and may change as products are updated. Check the version date on this sheet. Confirm site-specific framing, headroom and fixing details with Kinetic Access before construction. Kinetic Access accepts no liability for errors arising from the use of these files without that confirmation.

Need more detail?

Book a 15-minute call with Jason Field, our General Manager. He'll work through your opening, framing, headroom and finish options.
